CABLING

STRUCTURED CABLING - (UTP & FIBER)

The core of network infra building–starts with the design process, goes through installation, and ends with finalizing and commissioning. Each stage goes through strict quality control for reliable and durable cabling infrastructure. Be it any size of architecture or business, we design expert data center cabling systems, housing complexes cabling systems, industrial complexes cabling systems and, malls and retail outlets cabling systems. We can provide UTP twisted pair cable reports on installed cable network using Fluke Networks device for both UTP cable networks -CAT 5E, 6, 6A, or 8.

United Arab Emirates

T D R A

CCTV

SURVEILLANCE SYSTEM

We are one of the leading providers of security solutions in Dubai (Approved by SIRA) and Abu Dhabi (Approved by ADMCC). Our complete CCTV solutions are meant for leading retail outlets, banks, money exchanges, Jewellery outlets, Art Galleries, embassies & consulates, hotels, industries, warehouses, commercial, and residential buildings, etc. Experience high-quality products of well-known brands and quality services ranging from site visits to complete cabling, installations, testing and commissioning of CCTV systems at a very competitive price.

INTRUDER

ALARM SYSTEM

We bring to you the best Grade 2 and Grade 3 Intruder Alarm Systems. We deal in Satel andHoneywell brands for commercial and residential properties in Dubai and Abu Dhabi. Grade 2 systems can be used for residential properties like apartments and villas and commercial properties which do not keep or store any valuables like gold or huge amounts of money. Grade 3 systems are used at banks, jewellery shops, money exchanges, warehouses and any shop outlet which deals in high priced goods. It is mandatory to use a Grade 3 alarm system by Dubai and Abu Dhabi Police.
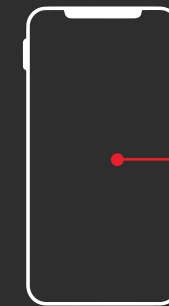

شـرطـة أبوظبـي
ABU DHABI POLICE

GPS

TRACKING SOLUTION

Introduce or upgrade the system that tracks the real-time movement of your fleet and provides advanced reports on the web and mobile applications. Features include tracking, reports, charts, alerts, fleet maintenance, fuel monitoring, video telematics, eco-driving, tyres management, TPMS, OBD analytics, ADAS, RPM monitoring, temperature monitoring, Tachograph, Geofence and POI.

We are a leading GPS Vehicle Tracking Solution provider approved by SIRA (Security Industry Regulatory Agency, a division of Dubai Police) to provide SecurePath Vehicle Tracking Services which cater Rent A Car vehicles.

TIME

ATTENDANCE AND DOOR ACCESS CONTROL SYSTEM

Install comprehensive and flexible Access Control software solution and Time Attendance System- also integrated into payroll application- specifically designed to meet the access control needs of any organization, irrespective of its size, layout, location, and timings.

IP

TELEPHONY AND PABX SYSTEM

In IP Telephony System, employees can stay connected with each other through a data network. The cost-effective unified communication solutions can bring together various communication methods so that employees can collaborate more easily. A recommended communications system that offers flexibility in configuration, maintenance, and monitoring. The solutions we provide are robust and address the communication needs of a growing enterprise.

We bring yet another functional system that can enhance the way communication is taking place within your organization. A PABX system acts as a connector between traditional key systems/circuit-switched PABX and advanced IP-based options. It can be tailored to suit the needs of businesses with a single site, multiple branches, or call centers.

SPEED
GATES AND TURNSTILE TRIPODS

We install the enhanced security system called Speed Gates at the entry/exit of corporate buildings, stadiums, public transportation systems and other venues. The system is designed to control the flow of people, prevent unauthorized access, and ultimately enhance overall security. It is integrated with access control systems and can be activated with a range of authentication methods such as smart cards, biometrics, and facial recognition.
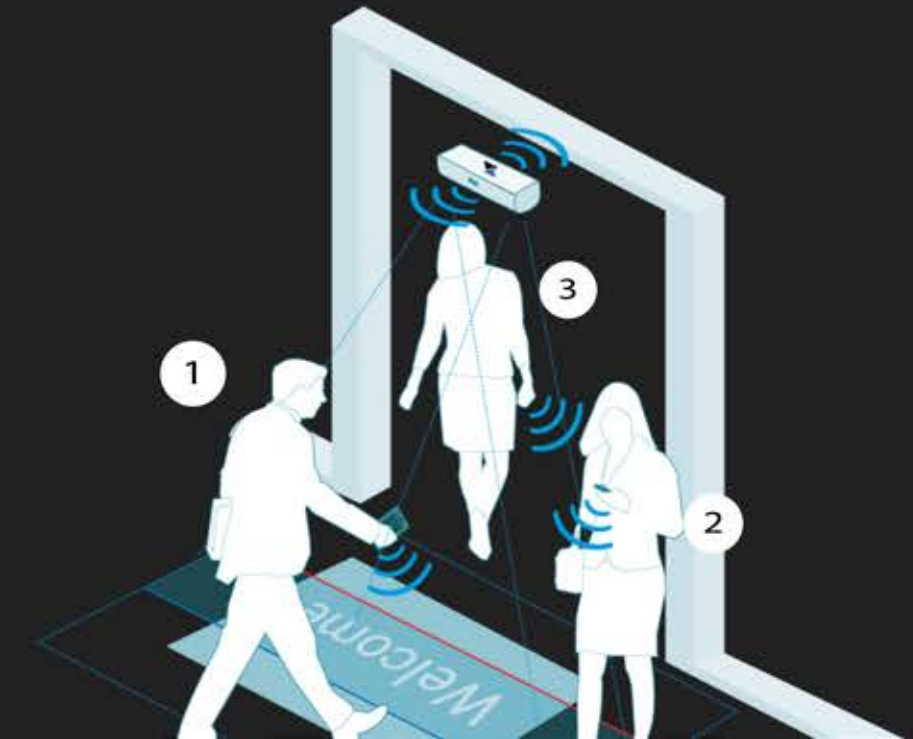

High or moderate security measures, depending on the level of risk, are required at points such as airports, subways, government buildings, amusement parks and other venues to control entry with restrictions. We provide the best turnstile tripods that efficiently operate by allowing one person at a time to pass through the barrier, after which the turnstile accurately rotates to block further entry until the next person presents their access credentials.

PEOPLE
COUNTING AND HEAT MAPPING

We provide people counting solution which helps you to gain detailed insights into your every store. The featured funnel analysis lets you allocate resources accordingly to raise levels of operational support along with each customer's journey, reducing costs while improving marketing efficiency.

Get a deep understanding of your customers' interests and behavior. Evaluate your store layout, purchase path design, and promotion effectiveness.

AUDIO
& VIDEO INTERCOMS

We deal in audio and video intercom of global brands. For high-end projects, we depend on the requirements of clients and supply audio and video intercom that meet specific needs. Audio intercom systems send and transmit only voice. By contrast, an audio and video intercom comes with both a speaker and a camera. As such, a building's tenants won't only hear voices; they'll also see who exactly that voice is coming from.

BARRIER SYSTEMS

Fix automatic gates and barriers to ensure that only authorized visitors are entering the premises. Our services range from IP Network communication systems to valid passing duration. We also offer bidirectional lanes for entry and exit, Remote control and management, LED indicators showing entry, exit and passing status. The speed gate services are flexible and customizable accordingly in different scenarios enhancing security.

EAS ANTENNA SYSTEM (ANTI THEFT)

Just think of innovative solutions designed for the protection of your merchandise. We offer a wide range of EAS product installation services like detection systems, sensors, detachers, and deactivators. With our integrated EAS solutions, you can be sure that your business is protected from shoplifting and other losses.

HOME & OFFICE AUTOMATION

We introduce an intelligent automation solution that provides comprehensive control over lighting, cooling, security, multimedia, shading, and energy management. With the smart home app, you can monitor and manage your home or office from anywhere, answer intercoms, accept deliveries, check energy usage, receive alarm notifications and more.

Secure Track features a multi-faceted security system that constantly monitors potential risks such as water leaks, fires, and burglars. Our Advanced Lighting Control allows LED lights to be customized to your needs and enhances your well-being with maximum energy efficiency. Our Smart Room Climate Control helps regulate the temperature in your room. Additionally, we offer automation for blinds and shading. The Fully Integrated Multi-room Audio system starts your day with upbeat music, enables customization of your doorbell sound, and makes announcements.

TOKEN

MANAGEMENT SYSTEM

The Token Management System is designed to provide a positive experience through efficient queue management. Banks and healthcare institutions prefer this system due to its simplicity, seamless operation, and the need for minimal hardware. The cloud-based technology enables quick token generation, efficient queue management, and real-time visitor reports.
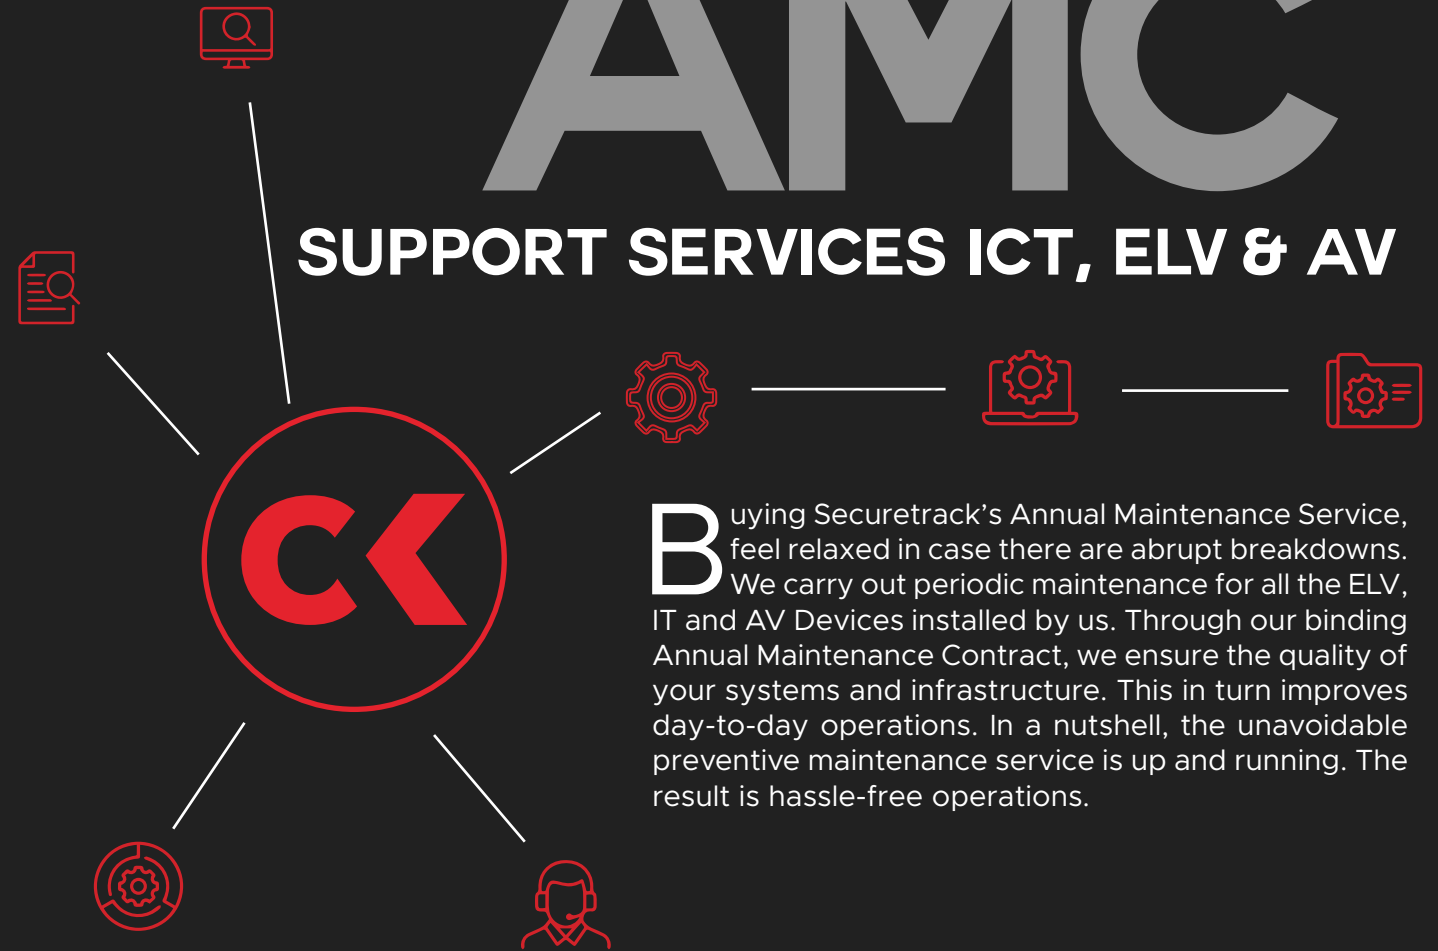

RETAIL
STOCK TAKE

However big your inventory volume is, we physically verify each product with accuracy and help you match the count against the recorded inventory level. We help detect any discrepancies and maintain accurate records for inventory management and financial reporting purposes. Avail of our stock verification services periodically, such as weekly, monthly, or quarterly, to ensure that the retail store's stock information is up-to-date and reliable. Verifying stock at regular intervals is hassle-free with our services in place.

AMC
SUPPORT SERVICES ICT, ELV & AV

Buying Securetrack's Annual Maintenance Service, feel relaxed in case there are abrupt breakdowns. We carry out periodic maintenance for all the ELV, IT and AV Devices installed by us. Through our binding Annual Maintenance Contract, we ensure the quality of your systems and infrastructure. This in turn improves day-to-day operations. In a nutshell, the unavoidable preventive maintenance service is up and running. The result is hassle-free operations.

IT
OUTSOURCING

If you wish to shape the future of the technology in your organization, we recommend our IT outsourcing services. We are one of the leading IT outsourcing companies that offer businesses the flexibility to keep up with the changing dynamics in the industry with our talented technical manpower resources.

By taking advantage of expertise, integrate new technology with reduced risks. Outsourcing is also the best method to control costs for your organization. Through our cost-effective services, stay focused on your core business.
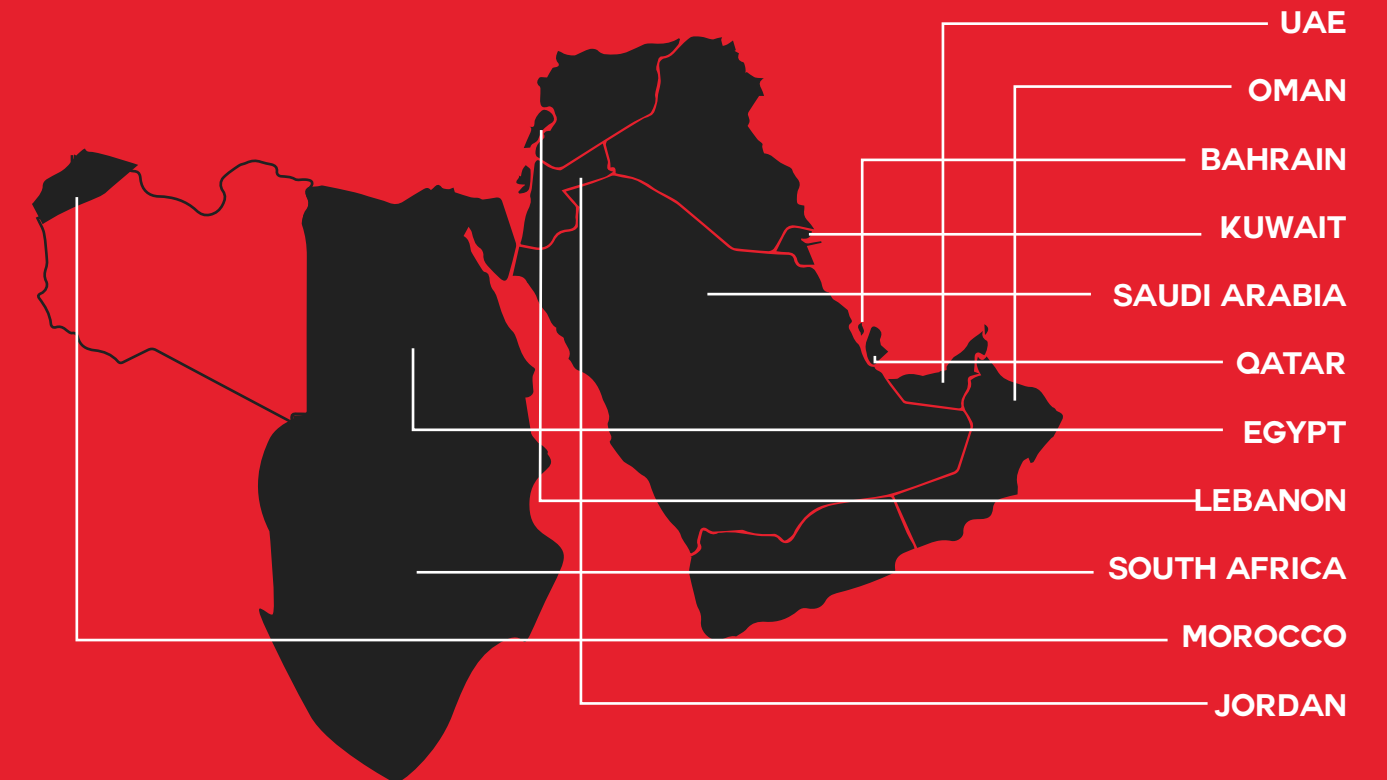

GUARD
PATROLLING SYSTEM

We offer up an expert Guard Patrolling System that helps in streamlining the patrol management process. Since it is a key aspect for strengthening the security of your organization, we bring to you the most advanced and performance-centric security guard patrol tracking management tools and software.
